

TE Standard Series

Extruded Channels for Tape Light

The Kichler TE Standard Series of Aluminum Extruded Tape Channels elevates your kitchen and shelving lighting projects. With simple mounting clips, varying depths for desired light diffusion, and snap-in lenses, these channels offer a polished look while simplifying the installation process. The TE Standard Series Channels are also available in kit form, for true ease of ordering.

Beam Spread Adjustment Accessory

Combine the Deep Well Surface Mount Channel (1TEC1DWSF8 SIL) with the Beam Spread Adjustment insert (1TEA1DWADJ8 SIL) and pair with either a flat, narrow and medium clear lens (1TEL-00/15/30-18CLR) to create one of nine custom beam spread options.

The Beam Spread Adjustment accessory (1TEA1DWADJ) can be inserted at the base of the channel, or inverted to elevate the LED placement to two different heights. The illustrations below depict the deep well channel without the adjustment accessory, as well as the effect achieved once inserted.

Shown with flat lens

Shown with medium lens

Shown with narrow lens

Channel Depth

- **Shallow Channel** - sleek, cost effective, presents a light distribution that's true to its source
- **Standard Channel** - common depth offers a light distribution that is gently diffused
- **Deep Channel** - allows the light to blend within the channel, resulting in a greater diffused light

Lens

- **Clear Lens** - allows the most light through, noting that diodes will be more visible
- **White Opaque Lens** - diffuses the diodes more, as well as disperses the light output
- **Narrow and Medium Lenses** - utilized to create a thinner, more direct beam for a desired end effect.
- **High Diffusion Lens** - sits up higher, creating more of a beam angle. The added height of the lens also works to disperse more light. This lens works with Shallow and Standard surface mount channels.

Accessories

This pendant cable accessory broadens the application capabilities of the surface mount channels. Suspend a straight length of channel above an island or work station to create a custom, low-voltage pendant.

1TEASPKSUS SIL
Pendant cable

To suspend channels as a fixture.

TAPE SOLD SEPARATELY.

Kichler offers 6T Series 24V Tape as well as 4T Series 12V Tape.
